

## Work Experience

26/08/2021 - PRESENT

### Web Developer

#### Sdaemon Infotech Pvt Ltd, Pune

- Implemented websites, and landing pages from mock-ups to development and deployment.
- Standardized all output with a new, responsive, mobile first approach and strategy.
- Developed cross-browser design support to match design specs for complex page layouts.
- Proficient in working with CSS **preprocessors** (**SCSS**), package managers (**NPM**), and version control systems (**Git**)
- Experience in working with Node.js for maintaining and deploying sites.

## Projects

### OTT Project

- Developed robust designs from scratch using **Angular, Angular Material & Ng Bootstrap**
- Implemented elementary animations on cards so as to engage the user experience.
- Added **Azure** media player where a user can actually watch a video.

### Jewelry Website [🔗](#)

- Designed and developed a jewelry website from scratch.
- Worked on its responsiveness so as make sure it works absolutely fine on multiple devices.

### Telemedicine Website

- Worked on the entire design of a telimedicine website which basically focuses on remote clinical services.
- These tools enable patients and healthcare providers to communicate efficiently through different lines of communication, like text, audio, or video.

## Personal Projects
