## EDUCATION

### Post Graduate Diploma in Advance Computing

- C-DAC Kharghar, Navi Mumbai.

### BE Electronics and Telecommunication

- Shri Gulabrao Deokar college of Engineering, Jalgaon, Maharashtra.

## ACADEMIC PROJECTS

Title: Retail Store Management

- The motive behind developing this system was to make work easier for the owner as well as the employees of the store. We have added various functionalities in the existing system trying to make it user-friendly. We have tried to implement the system using the recent technologies moreover these do not require additional dependencies to be added by user.

Title: Transformer Detection and Protection System

- It is a system used for protection against the theft of devices installed over a large area and connected to the low voltage power network. The task of the system is a quick and reliable transmission of information on interference in the device to its owner. So we have to incorporate monitoring and detection circuits. In this project we designed a system in such a way that it will monitor on the transformer continuously through GPS.

## LANGUAGES KNOWN

- ❖ ENGLISH
- ❖ HINDI
- ❖ MARATHI

### Impact:

Helping improve game playability and performance by filling vital bug

## SKILLS

JiraTool

Selenium

BrowserStack

Manual Testing

Bug Tracking

Charles Proxy

Jenkins

Compatibility Testing

Mobile Testing

Regression Testing

## ACHIEVEMENTS & SUMMARY

Quality assurance professional Experienced with approx. 3 years' experience in manual testing

Performed testing on a platform like Android, iOS, and Desktop browsers

During PG there was a module Software Development Methodologies which help me to gain the practical knowledge about the Jenkins, selenium tool, Git etc.

Passionate and enthusiastic Self-learner

Participated in Robotics Competition in the year 2016-17 at Shri Gulabrao Deokar college of Engineering, Jalgaon, Maharashtra

## Experience

**Position: Senior Test Engineer**

**1. GlobalStep Services:** October 2020 – February 2022

**Project: Scrabble Go (Scopely)**

**2. GlobalStep Services:** February 2022 – March 2023

**Project: Star Trek Fleet Command (Scopely)**

**3. GlobalStep Services:** March 2023 – Current date

**Project: Monopoly Go (Scopely)**

**Responsibilities:**

Work with a team of 10 to perform End-to-End testing including Destructive, Ad-hoc, free testing, bugs Regression, Networks checks and involve in the process of client interaction. Training team members on the technologies and making them familiar with game testing.
